So, you can select the output profile and destination, and initiate the conversion process. You can preview and split the video, set the output name, as well as configure audio and video settings when it comes to quality, streams, codecs, size, bit rate, frame rate, zoom, aspect ratio, encoding mode, sample frequency rate, channels, and others. Furthermore, you can merge and trim videos, create a new output profile, specify post task actions (e.g. exit program, turn off computer), set Xilisoft DVD Ripper Platinum to run in the background, use a bit rate calculator, change the interface skin and language, and more.
